## W8 PHYSICAL CYTOMETER

The W8 Physical Cytometer: Mass-Density and Weight as Novel Biophysical Parameters to Analyse and Sort 3D Cell Culture

The flow-based technology, which is gathering more and more attention since the official launch in 2021, combines sedimentation theory with customized image-based tracking analysis and software algorithms, to determine samples' mass density, weight and size.

## SPEAKERS

**Domenico Andrea Cristaldi PhD**  
R&D Specialist and Tech Marketing at CellDynamics

**Spartaco Santi PhD**  
Head of Digital Microscopy Center at IOR
