## LIVE CELL IMAGING WEBINAR

Innovative Staining Tools for  
Live Cell Imaging

**TUESDAY 15  
JULY  
11H-12H**

**REGISTER  
TODAY:**

We will highlight solutions selected to support both imaging facilities and end-users, including:

- Multicolor stains for core structures (e.g., DNA, actin)
- Tools for super-resolution and far-red animal imaging
- BacMan vectors for long-term live imaging
- Ready-to-use kits to label your protein of interest

Tebubio partner with companies such as Spirochrome, Abberior, Proimaging, and Montana Molecular – all recognized leaders in Live Cell Imaging.
